

TELEPHONE HEADSETS

OIT Telecommunication Services is pleased to offer two types of telephone headset systems for use with Ericsson digital telephones: wired and wireless.

WIRED

F300 – a convertible monaural GN Netcom wired headset with a number of wearing options. This headset can be worn on either ear in over-the-ear configuration, or can be converted for use with an adjustable headband.

F200 – a binaural GN Netcom dual-transducer wired headset with adjustable headband.

WIRELESS

Wireless Office Headset System - stylish and comfortable, this headset takes advantage of advanced noise-canceling technologies to bring you crystal-clear sound and provides numerous wearing options for customized comfort. Wireless headsets can be worn with a headband or with an ear hook and can accommodate either ear. Plantronics Wireless Office Headset System can free you from the tangles of a wired headset and enable you to do your work more efficiently while reducing stress. The exceptional range of Plantronics Wireless Office Headset System (up to 300ft) permits freedom of movement in and around the office while its advanced encryption circuitry maintains over-the-air confidentiality of your communications. Contact your TUG Rep to order yours now and experience the freedom!
